

CAROUSELS

Our custom metal slot bases are manufactured at our state-of-the-art plant in Las Vegas, NV and feature steel or aluminum construction. They can be punched for single or multiple games, with pre-punched sides for end caps and mounting holes. The interlocking corner seams and continuous welded corners provide a safe, durable product with unmatched fit and finish. We can manufacture to any dimensions, as all

orders are custom tailored to our customers' particular needs. All products receive our beautiful, durable powder coated finish, and arrive on site with a one year warranty. We offer free installation of VSR maximum security locks on all of our custom sheet metal slot bases.

CAROUSELS

Manufactured to form a variety of configurations

Interlocking flanges for easy installation

Available in all VSR manufactured base styles

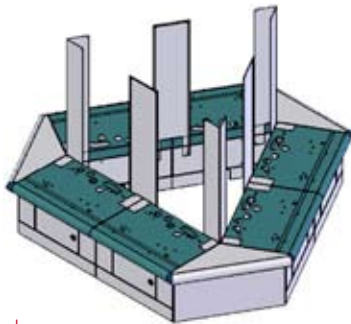

Available in a variety of durable powder coat colors

The carousel allows for machines to be placed in virtually any formation. The two base widths available for the VSR carousels are the Standard 27" or the Machine Width, which is the same width as the game and uses less floor space. If standard size bases are used, VSR manufactures a "Carousel Guard" to cover the gap between games. If machine Width bases are used, the gap is eliminated.

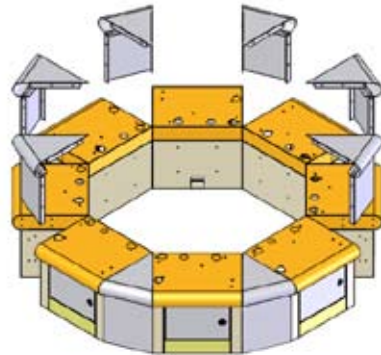

AVAILABLE IN

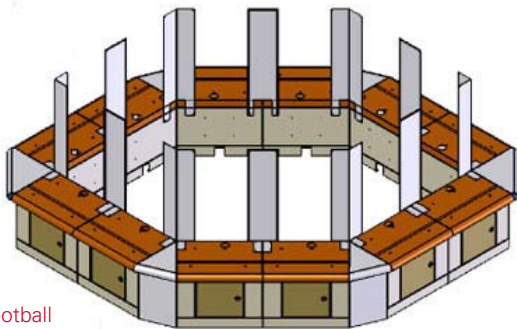

Multiple configurations

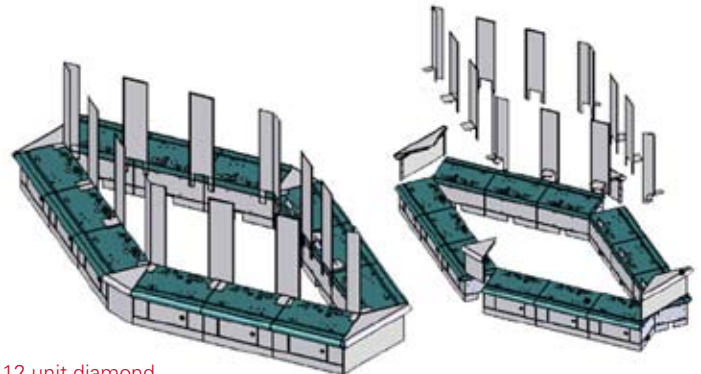

6 unit triangle

8 unit round

12 unit football

12 unit diamond
