

# SPECIALTY PRODUCTS

Our custom metal slot bases are manufactured at our state-of-the-art plant in Las Vegas, NV and feature steel or aluminum construction. They can be punched for single or multiple games, with pre-punched sides for end caps and mounting holes. The interlocking corner seams and continuous welded corners provide a safe, durable product with unmatched fit and finish. We can manufacture to any dimensions, as all

orders are custom tailored to our customers' particular needs. All products receive our beautiful, durable powder coated finish, and arrive on site with a one year warranty. We offer free installation of VSR maximum security locks on all of our custom sheet metal slot bases.

## LASER CAPABILITIES

LASER CUT IMAGE IN DOOR

LASER CUT SIGN SUPPORT END CAP

LASER CUT PIE WEDGE

LASER CUT IMAGE IN BULLNOSE

VSR Industries is fully equipped to design and cut any graphic image and customize your products with your name, logo, or any other depiction. No minimum amount to order. Our laser cutting capabilities allow anything from simple cutouts to complex dura-transfer images. Individualize your slot bases, end caps, computer workstations, or any other sheet metal product. When combined with back-lighting they add additional sizzle to your gaming floor..

## SIGN SUPPORT END CAP

Adds a finished look to machine banks

Access door for easy routing of power & assembly

Reversible and easy to attach

Free installation of VSR high security locks

Sign Support end caps provide additional space for promotional signage. The two designs are Angled Corner, with door in front only, or Square Corner, with door on side or front. Both are available in a variety of powder coat colors.
